Objective

Motivated and responsible MCA student with a basic knowledge of programming and a willingness to learn. Interested in taking initiative, participating in activities, and gaining practical experience while contributing positively to the organization.

Education

- Rajiv Gandhi Institute of Technology** 2025-2027
MCA
- Calicut University** 2022-2025
BSC. Computer Science

Certificates

- Artificial Intelligence Training Program**
Completed a short-term training program conducted by AccelerateX & Novolo.ai in June 2025 which focused on the fundamentals of Artificial Intelligence, Machine Learning, and Deep Learning. Gained introductory knowledge of key concepts and explored basic applications such as sentiment analysis and image classification through guided sessions and practical exposure.
- Introduction to Data Analytics – IBM (Coursera),**
Successfully completed IBM's Introduction to Data Analytics certification, learning the basics of data analysis, data visualization, and extracting insights from data.
- Cloud Computing - NPTEL Certification**
Completed a 12-week NPTEL Cloud Computing course, gaining knowledge of cloud infrastructure, virtualization, service models, and distributed computing concepts.

Achievements & Awards

- Served as a Career Ambassador, promoting career development initiatives and student engagement programs on campus.
- Completed YIP 6.0 and presented an innovative idea as part of Kerala's entrepreneurship and innovation initiative

Projects

- Personality Compatibility Lab**
Developed a MERN-based AI-powered compatibility platform that evaluates personality, interests, communication style, values, and goals through a 25-question assessment, generating personalized compatibility scores and insights using Google Gemini AI.
- Event Management**
Developed a dynamic web platform that simplifies event product shopping and rentals, enhancing convenience for users. Built using PHP (Frontend) and MySQL (Backend), the system ensures seamless user experience, secure transactions, and efficient order management. Key advantages include real-time inventory tracking, personalized recommendations, and a user-friendly interface, making event planning easier and more efficient.

Skills

- Programming Languages: C, Java, Python (Basic)
- Web Technologies: HTML, PHP (Basic)
- Database: DBMS, SQL (Basic queries)
- Core Concepts: Operating Systems (fundamentals)
